

Planning 2009/10 programs?

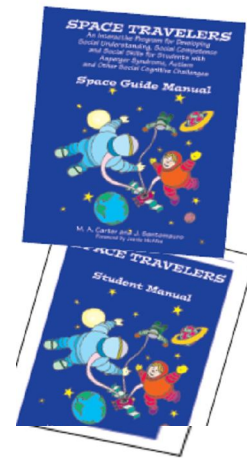

INTERESTED IN MAKING A DIFFERENCE IN CHILDRENS EMOTIONAL, HEALTH & WELLBEING SOCIAL UNDERSTANDING & SOCIAL THINKING?

Introducing an eight-week interactive program for developing social understanding, social competence and social skills for students with Asperger Syndrome, Autism and Other Social Cognitive Challenges.

Through fun and play activities, students learn the following skills: -

- ☺ Social understanding & social thinking
- ☺ Self-esteem
- ☺ Self efficacy
- ☺ Emotional literacy
- ☺ Reflective Problem Solving
- ☺ Relaxation
- ☺ Goal setting
- ☺ Responding to bullying behaviour
- ☺ Self mastery

Used across 4/5
year levels, whole
class, and small
group contexts.

What Others Are Saying:

"The theme and activities of *Space Travelers* will capture the interests and imagination of children and their teachers. This is an excellent program, based on the extensive experience of the authors, whom I have known for many years. The program focuses on the central characteristics of children with high-functioning autism and Asperger Syndrome and uses entertaining and informative activities that improve social understanding and social ability."

- Professor Tony Attwood, author, *Asperger's Syndrome: A Guide for Parents and Professionals*

"Students with social cognitive differences are constantly challenged to make connections in their complex communities of home, school and neighborhood. *Space Travelers* is an imaginative, focused program that successfully explores strategies to assist young people in being competent and confident in their social world. The program uses a multimedia format to engage the students and a step-by-step guide for the facilitator. I recommend *Space Travelers* as a timely resource for schools. Congratulations to the writers for the contribution of this very worthy resource."

- Rita Cleveland, Senior Education Officer, Support Teaching and Therapy Services
Brisbane Catholic Education, Brisbane, Australia
